

Brief overview of Membership Website

What i am looking for Membership website to have the following such as:

Anyone can register as a Candidate to avail services of Registered Member Consultants or College or University of our website

Any College or University can enrol on our website to get candidates who want to study abroad

any Consultant can register on our portal to get Candidates who are interested to Migrate

Register as the following: -

Candidate to Study or Migrate

College

University

Consultant

For Example: - Name of College / Country / Province / City / Courses offered / Intake / etc.
as a profile we need to create for all the categories

Candidates can avail Single service or Multiple services - They have to pay only Membership fee for example: FREE or PAID

USD 5 for Single Service

USD 10 for Multiple Services for One Year, Yearly Renewable

candidate can look for study or migrate or both

Consultants or University or College may pay us or we need to Enrol them FREE and we can work out with them for our benefits if any

As a Candidate if you select Option:

1. Study

2. Study and migrate, based on that feature will be enabled

Now, if you enrol for Study but you want to explore Migrate options as well after sometime during the year then you can upgrade your Membership

Candidate can view and access list of colleges n universities and filter based on their interest such as

Country

State

Province

Courses

Admission intake

Course duration etc, then they can send request enquiries to the selected colleges or universities

we will add all the data for college/university/consultant from user management
as we need different type of users with rights and privilege

User Management

Member Enrolment

Steps or Process to be defined for the Services
